

Wood Destroying Organism Inspection Permission Agreement

The undersigned allows permission for Arnest Termite Control to perform a **Wood Destroying Organisms Inspection** at the *visible and accessible areas* for the property located:

Permission is granted to probe wood covered by paint or stucco at the readily accessible areas and to water test plumbing as described below.

1. Inspection is at the discretion of the inspector.
2. (Except for very minor items), household items or storage items are not to be moved.
3. A probe such as a screw driver or short pole is allowed to be used to inspect wood surfaces that show signs of wood pest. Some surfaces that are to be probed may not show signs of wood pest but will be probed because they are at a location that the inspector has determined may be subject to damage.
4. Direct physical Inspection at the exterior is limited to the lower elevation or readily accessible areas only (at the initial inspection time)! A short ladder may be used where features attract the attention of the inspector.
5. *Permission is granted for the inspector to drill 3/8" test openings through the underside of stucco soffits or sides of stucco covered step abutments limited in number and at readily accessible locations!*
6. *A limited water test may be performed at stall showers (as prescribed by the Structural Pest Control Act.*

I the undersigned represent the owner and grant permission as described above:
